|-----|--|
| #21 | Show a seasonal countdown so players know when the current season ends |
| #22 | Give the admin panel visibility into which seasonal items are live right now |
| #23 | Let admins add or edit seasonal items without redeploying the server |
| #26 | Show earned titles on other players' profiles in the Discover feed |
| #27 | Let users preview what each title means before choosing it |
| #32 | Ease in the progress bars more smoothly when returning to the profile tab |
| #33 | Stagger the progress bar rows so each one enters slightly after the last |
| #60 | Split the About section into a more manageable size |
| #61 | Keep journal and story cards consistent when switching themes |
| #65 | Show who else is in a campfire room right now |
| #66 | Keep SSE working when the app wakes up after being in the background |
| #67 | Add a live 'unread' badge to the Messages tab when a new message arrives via SSE |
| #70 | Validate the guides endpoint so guide data can't silently break the app |
| #71 | Show a clear error message when story or journal data looks corrupted |
| #72 | Fix the TypeScript notification type mismatch in the app layout |
| #73 | Reset staleness timestamps when the user saves or deletes their own content |
| #74 | Show a subtle 'Refreshing...' indicator when stale data is being quietly updated |
| #75 | Cover the data-loading error paths so corrupted API responses don't silently disappear |

#76	Add tests for the discover feed and follow/unfollow flows
#77	Prevent image upload failures from showing a blank error to the user
#96	Show connection status when the app has no internet
#97	Retry failed story panel images from a tap on the panel itself
#98	Prevent stale data from flashing when switching between tabs quickly
#99	Show constellation type on profiles and let users update it
#100	Offer a gentle re-onboarding when users clear the app or log in on a new device
#109	Let readers skip forward to a specific panel without scrolling through the whole story
#110	Show a preview of the pull quote on the story creation screen so authors can see what readers will see
#111	Let the event banner auto-dismiss when the event ends — without a restart
#112	Surface the active event inside the story reader — so readers know which event a story was made for
#113	Prevent the event prompt from being lost if the user hits 'back' mid-story creation
#114	Prevent the Resonate button from double-firing if tapped rapidly
#115	Let creators see how their resonated story led someone to them (Resonate analytics)
#116	Make sure the existing API test suite doesn't fail silently due to missing database columns
#117	Catch banned-user stories that could slip into the Discover feed
#141	Clear the bell dot only after the user actually sees their notifications, not before
#156	Remove the APK diagnostic logging once Google Sign-In is confirmed fixed
#157	Confirm a second Google Sign-In on the same device loads fresh data correctly
#164	Confirm the profile page still loads correctly when all three fetches succeed
#165	Show level and XP on the Discover feed profile previews, not just full profiles
#166	Prevent a stale profile from being cached after a user deletes their account
#175	Confirm the discard guard holds when the user swipes to dismiss a modal journal entry
#176	Extend discard-guard coverage to the story editor and vibe-post publish flow
#182	Cover the add-journal-entry and add-outfit rollbacks so failed saves don't leave ghost content
#183	Confirm the story cache never saves local file:// image URIs after a delete-and-retry cycle
#184	Make sure concurrent deletes on the same item don't double-restore it
#220	Catch notification taps that arrive while the app is fully closed (cold-start path)
#221	Make sure new screens automatically appear in push-notification deep links
#247	Prevent blocked users from sending the block victim a campfire reaction
#258	Confirm blocked users are fully invisible across search and discovery
#265	Make sure expression sends (candle, spark, etc.) also show an error if they fail to deliver
#266	Confirm blocked users' messages disappear instantly without a reload

#267	Make sure campfire messages deleted by a moderator vanish server-side too
#277	Notify authors when their story or outfit is hidden by a moderator
#278	Make sure deleted-content notifications don't pile up if the same item is reported and removed multiple times
#279	Let authors reorder chapters without losing their place
#280	Let authors pick a cover image when creating or editing a book
#281	Let readers upload fan art directly from the engagement hub
#282	Show the author's name and avatar on the public book page
#283	Remember exactly where each reader left off in a chapter
#293	Show how many readers have opened a book chapter on its Discover card
#294	Confirm blocked users' book chapters don't slip into the Discover feed
#295	Let readers follow a book directly from a chapter card in the Discover feed
#296	Let readers tap the author name in the chapter reader to visit their profile
