

■ GameJo Development Build Installation Guide

Welcome!

Thank you for participating in the GameJo Beta Testing Program. This development build helps us improve the app before public launch.

Installation

1. Install the GameJo Development Build.
2. When prompted for the development server instead of **http://localhost:8081**, enter:

`https://a1cef6ff-3139-40c9-912c-4c93501f36f4-00-i8xo62403rjp.expo.pike.replit.dev`

If You Get Stuck

If reload gets stuck or an error appears, close the app completely, clear the app cache, reopen it, and enter the URL again if requested.

Need Help?

Please don't hesitate to ask for help. We also welcome your suggestions and feedback—they help us make GameJo better.

Important

This is a development build for testing purposes only. An Apple (iOS) development build will be available soon.

Thank You ♥■

We sincerely appreciate your participation and support. Thank you for helping shape the future of GameJo!
